PROFESSIONAL PROFILE

Founder and financial-services professional connecting banking, enterprise leadership, digital finance, research, and product architecture. Current work spans governed evidence, macroeconomic intelligence, institutional-finance simulation, and controlled rural-finance pilots.

CAREER & ENTERPRISE

Wishland founder and Enawuga lead architect

Leadership and product-architecture work associated with Wishland Networking PLC and the Enawuga demonstration.

Commercial Bank of Ethiopia junior banking role

Junior banking experience during 2006–2007.

Awash International Bank clerk and auditor roles

Clerk and auditor experience during 2007–2010.

Bunna Bank accounting, customer service, and branch management

Banking experience spanning accounting, customer service, and branch-management responsibilities, documented from 21 June 2010 to 31 January 2014.

Lion International Bank branch manager

Branch-management experience during 2014–2015, documented from 6 February 2014 to 17 August 2015.

Rahel Sime Import Export co-founder and general manager

Co-founder and general-manager experience during 2015–2018, documented from 16 September 2015 to 3 March 2018.

Education, research & product evidence

QUALIFICATIONS

Accounting diploma

Accounting diploma awarded 9 July 2005.

Bachelor's degree in Economics

Economics degree listed for 2008–2012.

Certified Digital Finance Practitioner

Digital Frontiers Institute CDFP programme completed from 24 September 2021 to 15 December 2025; transcript records 130 total credits and issuance on 14 January 2026.

Instant and Inclusive Payment Systems advancement program

IIPS advancement programme completed with a capstone project; LinkedIn records August 2021–July 2022.

RESEARCH & PROJECTS

Country Architect Diagnostic

Framework for understanding grassroots viability, institutional translation capacity, and market formation readiness.

Macro Indicator Studio

Interactive macroeconomic research workspace combining World Bank and IMF data ingestion, a 31,362-indicator catalog, deterministic econometric analysis, scenario research, provenance, and an AI research copilot. The source repository is private; the current public demo is hosted on Render.

Model6 Synthetic Investor Demo

A controlled synthetic bank/MFI investor replay using fictional institutions, invented customers, generated events, synthetic lending and receivables, illustrative liquidity/reconciliation, and waterfall evidence. It is explicitly a development baseline, not a production financial system; the current public demo is hosted on Render.

Sovereign Core / Enawuga Controlled Synthetic Pilot

Controlled synthetic rural-finance and DPI pilot demonstrating a bounded Agent Hub journey across farmer, pump, simulated PAYG, receipt, audit evidence, reset, tenant isolation, and role-scoped previews. The repository is private; the public launcher is synthetic-only and does not represent production authentication, payments, providers, persistence, or unrestricted mutations.

PROGRAMME & EVIDENCE BOUNDARY

EDI / UNCDF FinWise Cohort 2 participation is document-backed. Full credential inventory, research references, training, service roles, and project evidence are available in the public portfolio.

Career and learning records support experience and qualifications. Research and demonstrations have their own validation boundaries. Synthetic finance does not establish real payment, settlement, production integration, fundraising, or commercial outcomes. Private documents are available selectively for review.
