Abeselom Girum Chernet

Product & Financial Infrastructure Leader · Founder, Wishland Networking PLC

Ethiopia · +251 952 522 852 · abeselomgirum@gmail.com · LinkedIn · Source of Truth · Wishland

PROFESSIONAL PROFILE

Product and financial infrastructure leader with **19+ years across banking and enterprise**, combining banking operations, digital finance, financial inclusion, product and system design, applied research, evidence governance, and responsible AI/data workflows. Experience spans audit, customer service, branch leadership, enterprise development, founder-led product architecture, and evidence-gated technology delivery.

THREE DISTINCT WORK DOMAINS

Wishland · Enawuga family
Wishland Networking PLC is the corporate technology/orchestration context. Enawuga is its governed rural-finance/shared-agent infrastructure family. Licensed institutions retain regulated authority over accounts, funds, KYC, authorization, settlement, and agent cash authority.

Model6 · separate technology family
Backend technology, evidence-workflow, reconciliation, and decision-support infrastructure. The public Render environment is a bounded synthetic investor replay—not a live bank integration or production financial deployment.

Research family
CAD Phase 2, SRF resilience research, Macro Indicator Studio, and related work on institutional translation capacity, market structure, macroeconomic analysis, and evidence-governed research.

Institutional engagement
Document-backed external expert review of CAD v2.2 by a CGAP/World Bank specialist; regulator-facing E-PSM dossier submission to ECMA; and FinWise/EDI/UNCDF programme participation. None imply institutional endorsement, approval, licensing, or partnership.

EXPERIENCE & QUALIFICATIONS

Banking experience across **Commercial Bank of Ethiopia, Awash International Bank, Bunna International Bank, and Lion International Bank**, followed by enterprise leadership and business-development roles. Founder-led work at Wishland connects operating experience with product strategy, rural-finance infrastructure, partner integration, and evidence governance.

B.A. Economics · Certified Digital Finance Practitioner (CDFP) · Instant & Inclusive Payment Systems · Accounting Diploma

SELECTED PUBLIC EVIDENCE

Macro Indicator Studio: public macroeconomic research workspace with deterministic analysis, provenance, and AI-assisted research workflows. **Enawuga / Sovereign Core:** controlled synthetic rural-finance pilot. **Model6:** bounded synthetic institutional-finance replay. **CAD / SRF:** applied research with explicit validation and evidence boundaries.

Evidence boundary. Public demos, synthetic environments, working research, sandbox/TestBed activity, provider registration, and external review are not represented as production authorization, regulatory approval, institutional adoption, live settlement, fundraising success, or verified commercial outcomes. CAD certification claims remain limited to the governed Pilot-10 scope where applicable.
