Abeselom Girum Chernet

Product & Financial Infrastructure Leader · Founder, Wishland Networking PLC

Ethiopia · +251 952 522 852 · abeselomgirum@gmail.com · LinkedIn · Source of Truth · Wishland

PROFESSIONAL PROFILE

Product and financial infrastructure leader with **19+ years across banking and enterprise**. Brings operating experience from accounting, audit, customer service, branch management, trade, enterprise development, and founder-led product work into digital finance, financial inclusion, platform design, applied research, evidence governance, and responsible AI/data workflows.

CORE STRENGTHS

Product Strategy · Financial Infrastructure · Digital Finance · Financial Inclusion · Banking Operations · Payment Systems · Partner Integration · Evidence Governance · Applied Research · Responsible AI/Data Workflows

CAREER & ENTERPRISE EXPERIENCE

Wishland Networking PLC — Founder & Product / Financial Infrastructure Lead
Founder-led Ethiopian technology company
Leads product/system architecture and evidence-gated development for governed rural-finance and partner-integrated infrastructure. Wishland provides technology and orchestration; licensed institutions retain regulated authority.

Wishland Networking PLC — Business Development Manager 2019–2021 · document-backed
Business-development role within the registered enterprise context.

Rahel Sime Import Export — Co-founder / General Manager 2015–2018
General-management and enterprise leadership across commercial operations.

Lion International Bank — Branch Manager 2014–2015
Branch leadership and banking operations; performance recognition exists for foreign-currency mobilization without asserting unsupported quantified attribution.

Bunna International Bank — Accounting, Customer Service & Branch Roles 2010–2014
Banking responsibilities spanning accounting, customer service, and branch operations.

Awash International Bank — Clerk & Auditor 2007–2010
Operational and audit experience within commercial banking.

Commercial Bank of Ethiopia — Junior Bank Clerk 2006–2007
Early-career banking operations experience.

QUALIFICATIONS

Certified Digital Finance Practitioner (CDFP)
Digital Frontiers Institute · completed 2025; issued Jan 2026.

Instant & Inclusive Payment Systems
Digital Frontiers Institute advancement programme with capstone work.

B.A. Economics
Degree record covering 2008–2012; graduation certificate dated July 2012.

Accounting Diploma
Awarded July 2005.

Research, Product & Evidence Portfolio

Three distinct domains · explicit maturity and evidence boundaries

WISHLAND · ENAWUGA FAMILY

> **Corporate context:** Wishland Networking PLC is the technology/orchestration company. **Enawuga** is its rural-finance/shared-agent infrastructure family, including governed service orchestration, role-based operating surfaces, partner capability/route separation, and controlled synthetic pilot work. Licensed institutions retain responsibility for accounts, funds, KYC, authorization, settlement, and agent cash authority.

Sovereign Core / Enawuga Controlled Synthetic Pilot: bounded public demonstration across farmer, agent, pump, simulated PAYG, receipt and audit evidence, with role scope, tenant controls and deterministic reset. It does not represent production authentication, live providers, real payments, or unrestricted mutations.

MODEL6 · SEPARATE TECHNOLOGY FAMILY

Model6 | Institutional Backend & Synthetic Investor Replay: independent backend technology, evidence-workflow, reconciliation, and decision-support infrastructure. The public Render replay uses fictional institutions/customers and synthetic scenarios. IBM Cloud is historical; AWS was a bounded private synthetic lab that was rehearsed and stopped. No live settlement, institutional adoption, current production operation, real lending, real payments, or investor returns are established.

RESEARCH FAMILY

Country Architect Diagnostic (CAD) / CAD Phase 2: governed research on grassroots viability, institutional translation capacity, system dynamics and architect feasibility. Broader country research does not imply broad certification; governed certification remains limited to the specified Pilot-10 artifacts where applicable.

SRF Analysis — Ethiopian Financial Services Sector: independent research on resilience, crisis preparedness, recovery and resolution architecture. Volume II is publicly available on SSRN.

Macro Indicator Studio: public macroeconomic research workspace integrating source discovery, deterministic econometric analysis, scenario research, provenance and an AI research copilot. Public availability does not establish independently validated forecasting accuracy.

E-PSM / BERHANE OS lineage: market-design research and public synthetic prototypes. The underlying manuscript was submitted to the Journal of Capital Market Studies in 2025, declined, and subsequently author self-published; it is not journal-published or peer-reviewed.

EXTERNAL ENGAGEMENT & PROGRAMME EVIDENCE

- **CGAP / World Bank:** a Senior Financial Sector Specialist reviewed the confidential CAD v2.2 draft and provided constructive methodological feedback. This supports external expert review—not validation, endorsement, approval, or partnership.
- **ECMA:** document-backed regulator-facing submission of an E-PSM / BERHANE OS technical dossier; no approval, licensing, adoption, endorsement or partnership is established.
- **FinWise / EDI / UNCDF:** document-backed programme participation, 12-day bootcamp completion and final Pitch Day materials. No exact applicant-count claim, funding outcome or investment result is asserted.

Evidence boundary. Public demos, sandbox/TestBed activity, synthetic data, staging, provider registration and external review are not treated as production authorization, regulatory approval, live financial deployment, institutional adoption, or verified commercial outcomes. Research, project, document-backed and verified-public evidence are distinguished in the Source of Truth.
